I can only comment on past cases that are closed, we have a pending case for Trenton Kenosha 22CF1368 where my office is a special prosecutor. I don't see any case that have "gone away".

In 2017, Trenton was referred to a drug diversion program while my office was a special prosecutor. He was eligible for a Kenosha County Program that existed at that time. He met the conditions of the diversion and charges were not issued.

In 2020, my office was the special prosecutor for Trenton again on traffic and ordinance citations. A plea agreement was reached and he plead to one of four charges. Not an uncommon outcome.

As for Connie, she participated in a first time offender diversion program in 2020 and successfully completed her diversion so charges were dismissed. This was done in consultation with the victim, Ted Kmiec, pursuant to Marsy's Law.

I am unaware of any new charges from this week.

Hope this helps.

Tricia Hanson

Racine County District Attorney
